

## **Recovery plans for fish stocks threatened with collapse**

### **Information Sheet No 6: Market Measures**

**Version of 9 October 2001**

The Commission Communication on recovery of cod and hake stocks includes accompanying measures in the field of the common organisation of the market. The following measure will be proposed:

- **Suspension of intervention support for any species subject to a recovery plan**

Hake and cod are species eligible for intervention support under Regulation 104/2000 governing the organisation of the market in fishery products. The suspension of intervention support for these species is desirable. This will require the amendment of Council Regulation 104/2000 to that effect.
